## PROJECTS

---

### SmoothGulp [View in GitHub](#) [Demo](#)

- Developed a NodeJS application with ReactJs framework that provides a seamless shopping experience for beverage enthusiasts
- Implemented an efficient incremental sync mechanism, eliminating the need for re-syncing old highlights.
- Leveraged GitHub Actions to automate syncing of highlights whenever updates are made.
- Strived for continuous improvement by leveraging user feedback, implementing innovative technologies to enhance the overall user experience.

### LearnHorizon [View in GitHub](#) [Demo](#)

- Created a sleek and user-friendly school website using React, TypeScript, and Tailwind CSS.
- Designed an engaging and responsive interface to provide students and parents with easy access to school information and resources.
- Utilized GitHub Actions for automated deployment, ensuring the website is always current with the latest updates.
- Prioritized simplicity and usability, continually refining the design based on user feedback to enhance the overall experience.

### Scribble [View in GitHub](#) [Demo](#)

- Innovative online platform dedicated to providing a seamless shopping experience for book enthusiasts.
- Built using HTML, CSS, JavaScript, and Bootstrap, ensuring a responsive and user-friendly design that adapts seamlessly to various devices and screen sizes.
- Fostering a vibrant community of readers through interactive features such as book reviews, author interviews, creating a dynamic and engaging environment.
